

Xhoana Pole

 **Home** : Street:"Rruga Vellezerit Manastirli", 1001, Tirana, Albania
 **Email:** xhoanapole18@gmail.com  **Phone:** (+355) 0688525524
Gender: Female **Date of birth:** 17/06/2005 **Nationality:** Albanian

ABOUT ME

Part of the first generation of Artificial Intelligence students in Albania, currently studying at University Metropolitan Tirana. Experienced in machine learning, deep learning, computer vision, and NLP. Passionate about building real-world AI solutions and contributing to Albania's growing tech ecosystem.

EDUCATION AND TRAINING

[2020 – 2023] **High School Diploma**

School "Xhile-Lici"

City: Gramsh | **Country:** Albania

[2023 – Current] **BSc, Artificial Intelligence (3rd year)**

University Metropolitan Tirana

City: Tirana | **Country:** Albania | **Thesis:** Smart Career Matchmaking: Connecting Students with the Right Job Opportunities

Relevant coursework: Intro to Data Science, Intro to Artificial Intelligence, Machine Learning, Deep Learning, Computer Vision, NLP, Applied AI, Optimization & Heuristics, Web Programming

WORK EXPERIENCE

City: Tirana | **Country:** Albania

[01/2024 – 04/2024] **Learning mentor**

- Trained and mentored high school students in robotics, Arduino programming, and project development.
- Led weekly sessions on, coding, and troubleshooting while fostering teamwork and innovation.

City: Tirana | **Country:** Albania

[03/2025 – 04/2026] **Lead Mentor**

- Led two independent mentoring groups across consecutive academic years (2024–2025 and 2025–2026), guiding high school students in designing, building, and programming their own robots for national-level competition.
- Coordinated with fellow mentors to plan sessions, align on curriculum, and ensure consistent student progress.
- Supported students through the full development cycle, from concept and prototyping to testing and final competition preparation.

Raiffeisen Bank Albania

City: Tirana | **Country:** Albania

[06/2025 – 08/2025] **Junior Data Scientist Intern**

- Contributed to the Collateral Price Evaluation project, improving property valuation accuracy using real estate data from Century21, Remax, and ThePoint.
- Cleaned and merged multi-source datasets, performed feature engineering, and applied clustering techniques to deliver actionable business insights.
- Built data pipelines and geospatial analysis workflows using Python (Pandas, Geopy, scikit-learn), Excel, and VS Code.

SKILLS

Python | Machine Learning | Deep Learning | Computer Vision | Natural Language Processing
| SQL | Java | Microsoft Office | GitHub | Arduino | R | Agent-Based Modeling | N8N

Soft Skills

Good Listener And Communicator | Teamwork and Collaboration | Problem Solving | Event
Organization | Leadership Qualities | Public Speaking

AI Tools

Google Antigravity | Claude AI | Microsoft Copilot | Prompt Engineering | ChatGPT

PROJECTS

AI vs Real Image Detection

Computer Vision system for detecting AI-generated versus real images using CNNs, ResNet-18 transfer learning, and FFT frequency-domain analysis. Trained and evaluated multiple deep learning pipelines on diffusion-model datasets and developed an interactive Streamlit interface for real-time prediction and visualization.

Credit Card Fraud Detection

End-to-end machine learning pipeline for detecting fraudulent credit card transactions using models such as XGBoost, Random Forest, and Logistic Regression. Applied feature engineering, imbalance handling techniques (SMOTE/SMOTETomek), and evaluation metrics including AUC-ROC, F1-score, and MCC.

AI-Assisted R Shiny Dashboard

Interactive R Shiny dashboard developed using AI-assisted "vibe coding" and prompt engineering workflows during a Udemy course. Implemented reactive datasets, dynamic filtering, ggplot-based visualizations, histograms/bar charts, and linked UI-server logic while using AI tools for rapid prototyping, code generation, fake data creation, and iterative feature development.

Personal Portfolio Website

Responsive personal portfolio website developed to showcase projects, technical skills, and achievements through an interactive and modern UI. Built using HTML, CSS, and JavaScript with responsive layouts, animations, dynamic content sections, and an integrated contact form focused on usability and accessibility.

Employee Management System

Java-based employee management system developed with MySQL for storing and managing employee records through CRUD operations. Implemented database integration, user management functionalities, and structured backend logic for handling employee data efficiently.

LANGUAGE SKILLS

Mother tongue(s): Albanian **Other language(s):** English , Greek , French

CONFERENCES AND SEMINARS

[29/05/2024 – 31/05/2024]

POSWEB Congress Girne,Cyprus

Researcher and Presenter

- Co-researched and presented a paper titled "ChatGPT: A Threat or a Blessing in Education," investigating its effects on English language learning and teaching.
- Presented findings at the POSWEB Congress in Cyprus, highlighting the practical applications and potential of ChatGPT in educational settings.

[21/11/2024 – 23/11/2024]

CENVISU Turkey

Researcher and Presenter

- Conducted in-depth research on the transformative potential of English language technology in advancing global education and contributing to the United Nations’ Sustainable Development Goals (SDGs)
- Analyzed AI-driven language learning tools and their impact on accessibility, inclusivity, and educational outcomes in diverse communities.

CERTIFICATIONS

[Plato, 05/2025] **Assessment Certificate: Hyrje në Programim**

Online course covering Python basics: variables, loops, conditionals, functions, and problem-solving.

Skills: Python fundamentals, logical thinking, debugging basics.

Mode of learning: Online

[Udemy, 03/2026] **Certificate of Completion**

Online course covering the fundamentals of building Shiny apps with AI assistance: understanding AI-driven development, RStudio setup, logical coding steps, prompting strategies, test data generation, UI and server structure, and vibe coding techniques.

Skills: Shiny app development, R/RStudio, AI prompting strategies, UI & server architecture, logical thinking, prompt engineering.

Mode of learning: Online
