

We are looking for a Mid-Level Designer who can own visual output across our brand and product.

Who we are

Tirana-based startup building Albania's leading online marketplace for local artisans and independent retailers. We are a team of 15 moving fast and our visual identity is central to everything we do. We need a designer who can work independently, move quickly, and produce work that actually looks great.

What you will do

You will be responsible for all visual design output across our brand — social media content, digital advertising, email campaigns, packaging design for our seller community, and UI assets for the platform. You will work directly with the founders and marketing lead, contribute to creative strategy discussions, and occasionally brief and manage freelance illustrators or photographers.

What we are looking for

We need 2-4 years of design experience and a portfolio that shows strong visual thinking across brand and digital.

You should be highly proficient in Figma and Adobe Creative Suite and comfortable working in a fast-moving environment where priorities shift.

Experience with UI/UX design or e-commerce brands is a strong advantage.

Good English is important — we communicate in English internally.

What we offer

Competitive mid-level salary, flexible working hours, direct creative ownership with no layers of approval, a small tight-knit team that values good work, and real equity participation after your first year.
